#1—Sunflower House

An attractor for hummingbirds and ladybugs. Four seed packets \$10.00

BLACK RUSSIAN SUNFLOWER—12'–15' tall plants with blooms 8" across. A great plant for attracting bumblebees and birds to the garden.

DWARF SUNSPOT SUNFLOWER—2' tall. Produces a single large flower head 10"–12" in diameter.

TEDDY BEAR SUNFLOWER—Branching plants grow up to 6' tall and produce small black seed.

VAN GOGH SUNFLOWER MIX—5'–7' tall with flowers of 5"–6" diameter to a colossal 10".

#2—Heirloom Garden

Old-time varieties that have been handed down for generations. Four seed packets \$10.00

AMISH DEER TONGUE LETTUCE—Dates to the 1840s. Pleasantly sharp flavor, slow to bolt, and dependable.

CHIOGGIA/CANDYSTRIPE BEET—Pre-1840 Italian heirloom variety. Exceptional sweetness and long harvest. One of the earliest producers.

NANTES SCARLET CARROT—Bright red-orange flesh is crisp, sweet, and delicious with a high sugar content; fine grained with almost no core. Average 6"–7" long with blunt ends.

AMISH PASTE TOMATO—Late 1800s Amish heirloom. Plants produce clusters of deep-red, one pound, acorn or heart-shaped fruits with thick, sweet flesh with few seeds.

#3—Butterflies & Pollinators

Grow a simple and beautiful pollinator habitat in your yard.

Four seed packets \$10.00

MONARCH BUTTERFLY MIX—A mixture of seeds to grow nectar producing flowers that attract adult butterflies.

LEMON QUEEN SUNFLOWER—Lemon-yellow pointed petals with chocolate-brown centers up to 4–5" across that have a beautiful ability to attract pollinators by the droves.

CUT FLOWER MIX—From Asters to Poppies this mix is a nice selection perfect for fresh-cut flowers. Attracts birds, bees and insects.

DWARF MIXED PETUNIA—A garden favorite with sturdy compact growth. Very attractive to hummingbirds and butterflies.

#4—Fresh Salad

Make a "home-grown salad" or a great sandwich with these tantalizing veggies!

Four seed packets \$10.00

GLORIOUS GREENS LETTUCE MIX—15 fast maturing lettuces perfect for kitchen gardens.

PRINCIPE BORGHESE TOMATO—Small plum-shaped fruits, averaging 1–2 oz. grow in clusters, very meaty with little juice and few seeds.

GOURMET BLEND RADISH—A mix of at least 11 old-fashioned varieties. Early- and late-maturing varieties spread the harvest over many weeks. Plant spring and fall.

EVERBEARING CUCUMBER—Crisp fruit with excellent flavor, color and crunch.

#5—Pizza Patch

Grow the freshest toppings for the best pizza you will ever taste!

Four seed packets \$10.00

GENOVESE BASIL—Aromatic, flavorful, large and extremely tender leaves. Yields 7–8 cuttings and re-grows very quickly.

SAN MARZANO TOMATO—Rectangular flat-sided intensely red fruits 1½" x 4" long, borne in clusters. Excellent for pasta sauces.

TRUE GREEK OREGANO—Most pungent and flavorful of the oreganos. Holds flavor in cooking. Bees and beneficial insects love it.

JUPITER SWEET PEPPER—One of the best sweet peppers ever with high yields of jumbo, 4-lobed, thick green walls that ripen deep red. Yields well until frost and widely adapted.

About the seed collections

- Seeds are easy to grow!
- These varieties grow well in most climates, making seed collections great for friends and relatives wherever they live.
- All our seeds are heirloom and open-pollinated and non-GMO.
- To keep seeds viable, store them in a cool, dry place.
- For more information on everything seeds, visit www.UnderwoodGardens.com
